Technical SEO and AEO/GEO strategist with nearly eight years at Greenlane, from customer care to rewriting the SEO, AEO, and GEO for a multi-brand e-commerce catalog, plus a year running my own studio. I connect technical, local, and AI-search strategy with product content, conversion work, and AI-assisted systems that include human review, then measure results in Search Console and GA4. Seeking senior remote roles in SEO leadership, e-commerce growth, or AI and automation strategy.

EXPERIENCE

Founder · 9R Designs & SEO Tier 1
Sept 2025 – Present

West Palm Beach, FL · Web design, SEO/AEO/GEO, e-commerce, automation

- Lead strategy, design, SEO architecture, and delivery for home-services, childcare, motorcycle e-commerce, brokerage, industrial, and creative clients.
- Took a new electrician site (TFW Electric) to page one for Gwinnett County terms within ~100 days by fixing a JavaScript-injected noindex, consolidating canonicals, and adding Electrician schema.
- Took over product SEO for a motorcycle-parts e-commerce client in May 2025 and linked their shop site to their BigCartel store. In 90 days, monthly visitors grew from 396 to about 4,000, monthly orders from 4 to 101, and conversion from 1.0% to 2.5%. Updated their product content in bulk and built multiple websites for them.
- Rebuilt and optimized three preschool sites (seven campuses), including a bilingual EN/ES site. Fixed a lost-lead CTA, added attribution and GA4 lead events, and built privacy-safe lead reporting.
- Built reusable systems for SEO audits, content planning, Python/Gemini image SEO, and draft-only monthly reporting, directing Figma Make, Next.js, Shopify/Liquid, Supabase, and Make.com builds.

Web Content Strategist · Greenlane
2023 – Sept 2025

- Rewrote the catalog's product copy, SEO, AEO, and GEO across the brand portfolio, writing for search intent.
- Conversion rose from 1% to 3% in about three months, and revenue on key product lines rose up to 37%, driven by the intent-based copy and SEO work.
- Used AI to rewrite product copy and page metadata in bulk from large catalog data exports.
- Early AEO/GEO work earned Greenlane brands citations in ChatGPT and Gemini answers.

- Promoted to lead the customer care team and raised efficiency without adding workload.
- Taught myself AI tools as GPT launched and kept building that skill, which led into web content and SEO.
